

Disband HFI which is over-staffed, inefficient and unaccountable -
bring back directly managed housing services.

Deadline to sign up by: 28 August 2011 – Signatures: 212 (by 07 July)

We the undersigned petition Islington Council to Disband HFI which is over-staffed, inefficient and unaccountable - bring back directly managed housing services (More details)		
You must live, work or study within Islington to sign a petition. Please enter your name only; signatures containing other text may be removed by the petitions team	Your postcode <input type="text"/>	More details (from petition creator) Homes for Islington (HFI) was created to access Government funding and deliver Islington's Decent Homes major works - this has now been completed. Impending government changes in how council housing is financed means Islington will lose the subsidy it currently receives and as cuts begin to bite, the expensive outsourcing of services to HFI will force massive rises in rents and service charges for council tenants and leaseholders. Councils across the country are winding up organisations like HFI, recognising that they do not represent best value for public money, and bringing management of council housing back under direct council control. We need genuine accountability instead of token box-ticking exercises to retain HFI, an organisation which does not have residents' interests at heart.
